Football Manager: Tactical Arena Football Manager: Football Manager 09 Patch 9.2 The Football Manager 09 patch 9.2 fixes the "Olympic Games" mini-game introduced in this patch. See File Details for a list of changes. Football Manager 09 Patch 9.2

Fixes the issue where changing the goalkeeping tactics would not change the goalkeeping players to that tactic. Following the player save, the AI will follow the instructions given on the previous screen. This means that if a player has been assigned to the goalkeeper, then in practice mode the player will do whatever they are told in the previous screen. In real life mode they will

still do what they would normally do, but in the AI, they will only use what was assigned to them. This could be seen in the demo mode of the new online mode. In one of the first matches of the demo, both of the goalkeepers followed the instructions given, and were in fact both using their hands for the crosses. In the second half, this time both were using their feet for the crosses. It doesn't seem to me that I know this person. But somehow it's really hard to forget. I've had this happen a number of times in the last few years. It's the strangest thing. It's like a security blanket. As a scientist, I'm surrounded by facts and data. So why does this person stick out so much? I have no idea. We just can't seem to shake that person from our life.
