It appears maw-first, its mouth gaping, each of its teeth the size of your forearm. Its eyes are black and empty, its body marked by poison-bright stripes. Huge claws dig into the soft, mossy earth as it glides forward, moving so fast you know you could never outrun it, using its long grass-green tail for balance. The whole creature is over thirty feet long.

Alexius gasps, and the monster's gaze snaps to him.

"Not fair," the merchant whispers as, with a hideous bellow, the monster charges him—charges all three of you, with controllers scattering to avoid being trampled!

- I shout for the natives to help. I might end up beholden to them, but it's better than getting eaten.
- This is my job! Despite the danger, I raise my rifle to my shoulder and put a round in the monster's open mouth.
- I grab a burning piece of wreckage and try to lure the monster away, despite the risk.
- I hide! No way am I facing a monster like that!
- "Everyone open fire! We can stop it together!" Better to spend bullets than lives.

The sad thing is, this 'template' (yes, not even a full game or even a demo - see in game menu start screen below title - not sure how they got pass it Steam) could have been a good game comaparable to the old 80's and 90's beat 'em ups like 'Double dragon', if it was COMPLETED. Very sad, not recommended, not even as part of bundle (the way I got it). If this game was air, it would be Los Angels on a smog filled working day. Avoid. 1/10. you cant buy more of them. but otherwise good stuff.. The game is unpopular, and in vain. The game is worthy of your attention. It reminds me of the former exclusive "ZombiU". An accurate explore of the city in search of loot. You listen, you slowly move forward, you look around. I admit that the first time I did not appreciate the game and missed it, having spent a little time on it and not even realizing that this game is about stealth. But when I sat down to play a second time, it was 2 hours before the first death in the game, and only after that I paused. I think that the pace of the game is similar to "ZombiU" is very suitable for the game about zombies. A fragile hero, a lot of loot, a lot of zombies. Basingstoke is a good zombie game.. So ♥♥♥♥ing buggy.... Ok, this is an old game, but at its time it was lots of fun to play. Actually, I did not understand, why it did not rank much higher. It is a solid game which makes lots of fun. I played it through several times and that is pretty unusual for me.. Despite early access, this is a charming little game that blends XCOM and FTL mechanics. Obviously there's a lot of development to be done on it yet but the dev seems to be very keen to keep the process moving.. While the route looks great the provided trains have poor functionality which ruins the experience of the route. While an older game it is still a good game that once you get the hang of, it is quite addicting. Game: They only married you for the crown.

Me: How rude!

Would be insulted again.

Great game but the combat. Unfortunately for me the combat is the most important part :(Oh and the reason I don't like is your hero is way too slow. Dodge + 1 sword hit (that's if you land it before the enemy super fast strike you) and your out of stamina and back peddling for the next 5-6sec.. So this is a rather short VN each run through lasting about thirty minutes to an hour. I found the voice acting cring worthy and the use of profanity distastful. While I really enjoy the premise, I think I'll do my best to forget this VN until a better author writes it.. 1. This game is for all intents and purposes, the mature version of dotHACK.

2. Combat is 3D for real as in flying+ground combat and no "combat areas" it is completely seamless.

3. Fan Service. (ಠ_ಠ) (ಠ_ಠ) (ಠ_ಠ) (ಠ_ಠ). Adds three cars, one of which is actually my favorite in the game...so, for me, picking up the DLC was great! However, it isn't really going to be worth it for most people since the game doesn't really offer a lot of content and the DLC doesn't add any either. I'd only recommend picking up the DLC if you really love the game and dump a lot of time into it, so a couple of extra cars to play around with can add to the fun...otherwise, the cars in the main game do just fine.. As it is, it's a fun little detective game, however it does suffer from some later grammar errors and what's interesting is the outcome can change, depending on who you talk to at what point during the game. I feel that the developer did pour their heart into it, however it still suffers a few problems and was clearly a mobile game, with certain areas asking you to tap, despite using a mouse and keyboard.

It's certainly fun for what it is, especially with different outcomes that can happen, depending who you accuse and how closely you look at the evidence.. MORE TOPPINGS
